SUMMARY

Research and Analysis

Transforming agricultural challenges into sustainable solutions is my specialty. With a Bachelor's in Agribusiness Management, I excel in extension, marketing, and data analysis using SPSS, STATA, Power BI, Python, SQL, and Excel. This expertise, gained through education and hands-on experience, has resulted in enhanced agricultural productivity and sustainability, driving data-driven decisions and impactful results in diverse agricultural environments.

SKILLS

Data analysis and presentation ·

Conducting Research and drawing data driven conclusions ·

Animal feed production ·

Black Soldier Flies Farming ·

Web Development ·

Mobile Android Applications Development ·

Database Management · SPSS ·

STATA · Python · Power BI · Excel

STRENGTHS

Leadership:

Guides teams to achieve project goals and navigate complex challenges

Detail-Oriented:

Ensures precision in data analysis and feed production through meticulous attention to detail.

Analytical Skills:

Expertise in using analytical tools like SPSS, STATA, Power BI, Python, and Excel to analyze and interpret complex data

EXPERIENCE

Research and Data Analysis Intern 05/2022 - 08/2022
[Bidco Africa](#) Thika

Company Description

- Researched Bidco's history and farmer engagement methods; reviewed 10 sources, resulting in a comprehensive report that increased farmer engagement by 15%.
- Analyzed the impact of the Russian-Ukraine invasion on the food industry; conducted in-depth analysis of 15 reports, leading to 5 strategic policy recommendations.
